**AKROPOLIS**  
to welcome.

### **AKROPOLIS: (greek for upper city)**

An „Acropolis“ is any citadel or complex built on a high hill. Ancient settlements (Plaka) sought the natural protection of isolated mountains, which were usually fortified. Often lay on them the main temple.

In the heyday of the Mycenaean culture, the Acropolis was the seat of the king of Athens. Until the 6th century BC the castle and city of Athens were identical, the Acropolis was called Polis. Around the year 680 BC the palace was replaced by a temple.
